

# Solar Panel Cleaning

Solar panels are common place now on new build properties and also more and more home and business owners are investing in energy saving products.

Since solar panels create energy from the light source of the sun anything that restricts the light energy from your solar panel will greatly reduce the performance provided by them and cost you money! As a result it is very important that you get your solar panels cleaned of dust, vehicle pollutants, grime and bird mess ensuring that your solar panels are operating efficiently!

We use an environmentally friendly Hot Pure Water Reach and Wash Cleaning System, which ensures great cleaning results to help your solar panels run more efficiently, this method does not leave any residue, streaks or spotting behind!

So if you want to maximise your investments potential give A+ a call today.

**Manufacturers warranties and government guidelines recommend solar panels are cleaned on a minimum annual basis!**

**Regular cleaning will maintain your investment, and it will last longer also regular solar panel cleaning will maintain your manufacturer's warranty.**

**Solar panel cleaning will save more money than the cost of having them cleaned!**

**You could lose 25% efficiency per annum through dirt build up!**

**Safe Cleaning from the ground by a fully insured contractor!**

**No Detergents or chemicals are used! Environmentally friendly - Solar panels are very environmentally friendly. We are also concerned about the environment that is why we use heated purified water, eliminating the need for detergents or chemicals. We use about 10% of the amount of water needed to simply hose down the solar panels down from a standard on site water supply!**
